## **eReview - Web Conference and Collaborate in Real-Time On-Line Collaborate with Architects, Engineers, Contractors, Suppliers**

**June 19, 2001 – A/E/C EXCLUSIVE** - Web4, Inc., a subsidiary of netGuru, Inc. officially released its newest product, eReview, the first Java-based software to combine a simple way to conduct online meetings with real-time view and annotation capabilities. eReview allows multiple meeting participants to collaborate on documents, drawings, and CAD files in real-time using only a Web browser and Internet access. Many products claim "collaboration", but eReview is the first product of its kind to deliver true online interactive collaboration and conferencing integrated with document review.

Do you share your CAD drawings with architects, contractors, engineers, and suppliers? Ever have to review or discuss CAD drawings with them? Is there travel involved? Need to be able to solve problems in real-time from construction sites? Wouldn't it be simpler, if bidders, contractors, etc. could just come to your web site and view any relevant CAD drawing without having a viewer on their desktop. Tired of not having an archive of critical decisions that are made at construction sites, in the office, with colleagues, with others?

Meeting participants do not install eReview on their desktops and do not need the software applications used to create documents or drawings being reviewed. With both a built-in Multiple Document Interface (MDI) and a Java Applications Programming Interface (API) built-in, eReview facilitates online meetings in which participants share, view and annotate multiple documents or drawings created from various applications in more than 150 file formats. These include scanned and other raster images, vector formats, postscript, and PDF, printer outputs, office documents (WORD, EXCEL, ACCESS, text), CAD 2D and 3D drawings (**DWG, DXF, DGN**) and, eventually 3D modeling. eReview also integrates with EDM/PDM, ERP/MRP and other engineering analysis/design software and databases. Integrations with both Documentum and e-Matrix are available.

Using eReview transforms the time-consuming engineering review and bidding process into a series of interactive meetings among the right people and decision makers, saving both time and money. With eReview, efficiency and productivity are increased while expenses are decreased.

## **About Web4**

Web4 offers independent, complementary technical design and engineering software in an integrated environment that includes a document and project hosting module, the WebWorks Center™, with eReview™, a proprietary viewing and collaboration tool that offers a real-time, interactive viewing, reviewing, annotation and Internet meeting capability via text chat and Voice Over Internet Protocol (VOIP). Web4 also offers a full suite of ASP business solutions, ranging from the development of Intranets and Extranets to a comprehensive turnkey IT solution that provides a knowledge-sharing Virtual Private Network environment. Corporate offices for Web4, Inc. are located at 22700 Savi Ranch Parkway in Yorba Linda, Calif. The telephone number is (714) 974-2670 or toll free (888) 376-8900.

## **About netGuru**

netGuru is an integrated Internet technology and services company. The Company provides IT services, ASP services, PC-based engineering and animation software products to customers worldwide, and special interest portals focused on telecommunications and travel services for Asian expatriates and Internet-related B2B services in India.

netGuru has offices in the United States, India, the United Kingdom, France, Germany and Singapore and distributors in 40 countries. The Company currently licenses its engineering and animation software products to more than 20,000 businesses, with 50,000 installations and 150,000 users in more than 65 countries. More information about the Company is located on its Web site at [www.netguru.com](http://www.netguru.com).

## **Safe Harbor Statement Under the Private Securities Litigation Reform Act of 1995**

*With the exception of historical information, the matters discussed in this press release are forward looking statements that involve a number of risks and uncertainties. The actual future results of the Company could differ from those statements. Factors that could cause or contribute to such differences include, but are not limited to, the continued demand for the Company's services, worldwide economic conditions, changes in governmental regulations and policies, the emergence of competitive products and services, unforeseen technical issues and those factors contained in the "Risk Factors" section of the Company's Form 10-KSB for the fiscal year ended March 31, 2000.*
