netGuru, Inc Offers Online Meeting, Conferencing and Document View/ Review Technology

Yorba Linda, Calif. – September 26, 2001 – Web4, a subsidiary of netGuru, Inc. (NASDAQ:NGRU) an Internet technology and services company, has officially released **eReview™ 3.5**, the first truly collaborative Java-based document centric meeting, conferencing and collaborative review system. **eReview** provides not only the features and functions of e-meeting and application sharing available through Webex and netMeeting, but takes business to the next level by allowing companies to interactively share ideas and documents, drawings, multimedia files and other work products while reducing or eliminating the need to bring corporate employees and clients or customers together for meetings. Unlike other online conferencing tools, **eReview** allows users to natively view enterprise-wide data from local, network, database or any other types of document vault, whether they reside on Windows, UNIX, or Mac platforms.

In addition to functions such as online e-meetings, virtual office space, live chat and whisper, and application and desktop sharing offered by other online conferencing tools, **eReview** provides for:

- Natively viewing variety of documents and heterogeneous data that reside on Windows, UNIX or Mac platform
- Meeting participants to jointly view, markup and collaborate on any document or drawing without the need for the originating software application and without on-the-fly conversions
- Interactive and intelligent sharing of native 2D and 3D CAD models and drawings
- Server based viewing as well as client based viewing
- Selective redacting or blocking out of portions of the document for some or all attendees
- Ability to save and retrieve markups per document
- Ability to support files from local, network, database or any other types of document vault
- Meeting messenger system to notify and invite team members through instant messaging

-More-

With **eReview™**, businesses achieve time savings, cost reductions, increased productivity and efficiency, and faster decision making along with reduced travel worries by holding meetings from anywhere with anyone in the world using just an Internet connection and a Web browser. **eReview** lets meeting participants jointly view, markup and collaborate on any document files without the need for the originating software application.

eReview is the only Java-based client/server based solution that provides a true Multiple Document Interface (MDI), allowing users to open multiple documents or drawings in separate windows, then work with each individually. Documents under review are synchronized so that all online meeting attendees can view crucial comments or annotations made by other meeting participants. All meeting transactions, including markups, versions, text chat, and annotations are logged and saved, available for future playback using XML is a complete, online meeting management system with an optional meeting scheduling, pre-invitation, reminders, and automatic start and join meeting module.

More details about the new features of **eReview** are available at www.eReviewonline.com.

About Web4

Web4 offers independent, complementary technical design and engineering software in an integrated environment that includes a document and project hosting module, the WebWorks Center™, with eReview™, a proprietary viewing and collaboration tool that offers a real-time, interactive viewing, reviewing, annotation and Internet meeting capability via text chat and Voice Over Internet Protocol (VOIP). Web4 also offers a full suite of ASP business solutions, ranging from the development of Intranets and Extranets to a comprehensive turnkey IT solution that provides a knowledge-sharing Virtual Private Network environment. Corporate offices for Web4, Inc. are located at 22700 Savi Ranch Parkway in Yorba Linda, Calif. The telephone number is (714) 974-2670 or toll free (888) 376-8900.
