Web4's eReview™ Collaboration Tool Selected as Core Technology for Largest Engineering/Manufacturing ASP for Asian Markets run by TCS, Asia's largest software & services company

YORBA LINDA, Calif., June 19, 2002. Web4, a division of netGuru, Inc. (Nasdaq: NGRU), a provider of enterprise collaborative commerce solutions, today announced securing a contract for eReview Collaboration technology to be used in an Engineering/Manufacturing ASP by TCS (Tata Consultancy Services), Asia's largest global software and services company. eReview was chosen as the appropriate and suitable technology for this ASP to be set up in the industrial city of Coimbatore, India. As part of an integrated IT services and products contract, TCS has purchased 100 concurrent licenses of eReview. eReview is an integral component of an elite technology solution stack for this project. TCS chose eReview for its flexible architecture, which allows for customization and seamless integration with products from global technology giants such as IBM, Oracle and BEA Systems.

TCS' vision will allow for large multi-national firms to access their Engineering/Manufacturing ASP in real-time to review and markup robust 2D and 3D engineering/CAD models and documents through this ASP. eReview will be used to view and collaborate on documents from various ASP components such as Project information, Procurement and buys-sell process. The web4 team will provide high-end integration between eReview and IBM's Lotus Notes workflow management system. eReview's web-based collaboration for document review and markup is a vital component for Asia's first comprehensive Engineering/Manufacturing ASP solution.

Commenting on the development, Mr. Amrit Das, Chairman & CEO of netGuru said, "In addition to our success in North America this contract award establishes our footprint as a leader in CPC technologies in the global markets. We take great pride in adding prestigious clients such as TCS to our list of success stories. Our eReview technology's advanced architecture makes it extremely customizable by seamlessly integrating with products from technology leaders such as IBM, Oracle, and BEA Systems. This award in the Asian market shows significant momentum in our progress with our Web-based collaboration, ASP and Internet IT businesses. We are confident that we will be able to continue our rapid growth in North America, Europe and other world markets."

--More--

The TCS Practice Head for Engineering Services, Mr. Regu Ayyaswamy, commented that “eReview™ was found suitable for the key industries that will be served by this ASP. The ASP will help the industries reduce the new product development cycle, facilitate ease in engineering change management (existing product design changes), reduce rework for manufacturing firms as well as their suppliers and eliminate visits of suppliers spread across India and worldwide. The key criteria were a lightweight solution that can address the requirements comprehensively and at the same time offers easy deployment and usage. EReview Product was able to support the various formats and the collaboration needs of the customers in the region well. The customer profile largely includes growing segments such as small and medium scale enterprises where global connectivity enhances their reach and access. eReview’s connectivity and bandwidth needs are modest and hence affordable by these industries.”

About eReview

eReview offers a one-to-many model of collaboration, moving one step ahead of the traditional peer-to-peer model. The software requires only one server-based installation, saving clients having to install anything further on their machines. eReview is also platform agnostic in the sense that it can seamlessly run on multiple platforms such as Windows, MAC, UNIX simultaneously. Furthermore, eReview has the capability to read native file formats without the need for original applications on either the client or server machines. Incorporating powerful new features like 3D model viewing, and compatibility with over 150 2D file formats and MS-Office documents, eReview 3.6 offers state-of-the-art desktop application sharing and Web-based collaboration via textual chat, voice and video conferencing.

eReview is a valuable tool, shortening the product development lifecycle and promising quicker deployment for the packaging, manufacturing and A/E/C sectors.

About TATA Consultancy Services

Tata Consultancy Services offers a dynamic blend of strategy consulting and system integration services to help organizations architect and build their businesses in the eEconomy.

Investing in collaborative research with the industry and academia, partnering global technology leaders and executing innovative projects for over 800 clients across 50 countries give Tata an in-depth knowledge of the internet economy. Their 60,000 person years of experience in providing end-to-end solutions in diverse business areas and technology domains further empower them to deliver measurable business results to their clients.

Tata’s, SEI CMM Level 5 status, knowledge and expertise of more than 19,000 employees, world-class products and proven offshore capabilities strengthen their value proposition and make them a global delivery center of choice - as endorsed by many Global Fortune 500 clients.

TCS' total revenues for 2000-2001 stand at over \$689 million. Revenues have been consistently doubling every two years, for the last six years.

A Tata group company, TCS also believes that IT is a key factor for social development, and has embarked on several such ventures.

About Web4

Web4 is a comprehensive provider of complete ASP and enterprise-wide collaboration solutions and technologies including its two-cornerstone products, eReview (a real-time, platform agnostic collaborative 2D/3D viewer capable of natively reading over 150 file formats) and WebWorks (a comprehensive task/document management system). Web4 also offers a full suite of ASP business solutions, ranging from the development of Intranets and Extranets to a comprehensive turnkey IT solution that provides a knowledge-sharing Virtual Private Network environment. Corporate offices for Web4 are located at 22700 Savi Ranch Parkway in Yorba Linda, Calif. The telephone number is (714) 974-2670 or toll free (888) 376-8900.
