

FUJI XEROX SELECTS NETGURU'S EREVIEW

Web4's leading viewing and collaboration technology
to be bundled with Fuji Xerox Singapore's leading ECM product

YORBA LINDA, CA – May 20, 2003, Web4, a division of netGuru, Inc. (NASDAQ: NGRU), a provider of enterprise collaborative commerce solutions, today announced an exclusive distributor agreement with Fuji Xerox Singapore (FXS), a leading provider of document and knowledge management solutions and a key innovator in the enterprise content management (ECM) arena. Web4 will integrate eReview, Web4's leading two-dimensional (2D) and three-dimensional (3D) collaborative viewer, with FXS' knowledge-sharing product, DocuShare. DocuShare is a collaborative work environment that enables the sharing, repositioning and management of any document across an enterprise. FXS will retain the exclusive rights to sell eReview in Singapore with FXS' proprietary document management suite of products in all vertical markets excluding the oil and gas industries.

By integrating eReview's market-leading real-time visualization, markup, conferencing and collaboration technology, FXS will help solidify its offerings in the ECM space by adding interactive, real-time, native viewing of structured and unstructured data found in many popular document types like 2D and 3D Computer Aided Design, Microsoft Office documents, raster images and Electronic Design Automation. With the help of eReview, FXS users familiar with automating and controlling their workflow processes with FXS' suite of content management products like DocuShare will now have the added ability to collaborate at any point in a document's life cycle. eReview meetings can also be saved, replayed and archived into DocuShare's work environment.

FXS has also incorporated eReview in its "Knowledge Window," an integrated digital meeting space comprising Web4's eReview, 3M's Digital WallDisplay and FXS' suite of document management and knowledge management software and hardware. Knowledge Window will provide a single platform that will enable users to capture, manage, annotate, present, collaborate, distribute and share information put forth in meetings, conferences, trainings or discussion sessions.

"eReview certainly strengthens FXS' solutions offerings. This solution is a necessity in our current geopolitical environment when physical meetings may not be possible due to health, security or cost concerns. It is critical that business meetings go on as usual with attendees being able to not just easily and freely discuss but also be able to annotate and review documents so that decisions can be made in a timely manner. eReview goes beyond the normal view and markup application and encompasses real-time interaction and decision making tools," said Willie Lim, Solutions Marketing Manager, Fuji Xerox Singapore.

Commenting on the distributor agreement, Amrit Das, Chairman & CEO of netGuru said, "Having the opportunity of an ECM leader like Fuji Xerox bundle our product with its content

management products, truly reinforces eReview's position as a market leader in the real-time document collaboration space. With over \$100 million in sales in South East Asia, FXS will be able to immediately bring the benefits of eReview to Fortune 1000 companies in South East Asia. We are pleased to have been selected to represent the collaboration aspect of FXS' products."

About eReview

eReview offers a one-to-many model of collaboration, moving one step ahead of the traditional peer-to-peer model. The software requires only one server-based installation, saving clients having to install anything further on their machines. eReview is also platform agnostic in that it can seamlessly run on multiple platforms such as Windows, MAC, UNIX simultaneously. Furthermore, eReview has the capability to read native file formats without the need for original applications on either the client or server machines. Incorporating powerful new features like 3D model viewing, and compatibility with over 150 2D file formats and MS-Office documents, eReview 4.0 offers state-of-the-art desktop application sharing and Web-based collaboration via textual chat, voice and video conferencing.

eReview is a valuable tool, shortening the product development lifecycle and promising quicker deployment for the packaging, manufacturing and A/E/C sectors. A sample of clients currently using eReview include Agilent Technologies, CNH Global, Paxonix, LG, Constructware, eBuild, TCS and Tejari.com.
